

Team Members

- Nasiphi Ntontela
- Lungani Shezi
- Mkatoko Chauke
- Mutsawashe Njowa
- Dorsa Shahrokh
- Tendai Dhlamin

Meeting 1 — Retrospective

Date	12 May 2026
Time	5:15 PM
Duration	Approximately 8 minutes
Meeting Type	Retrospective / Informal Daily Scrum
Attendees	Nasiphi Ntontela, Lungani Shezi, Mkatoko Chauke, Mutsawashe Njowa, Dorsa Shahrokh
Facilitator	Nasiphi Ntontela

1. Receptionist Availability Feature

The team discussed an outstanding feature relating to doctor availability on the receptionist interface. It was noted that the current implementation still resides on the receptionist page. A proposal was raised to integrate the doctor's unavailability schedule with the receptionist view, such that when a doctor marks themselves as unavailable, the receptionist dashboard reflects this status automatically. The team agreed this was a viable and desirable enhancement.

2. README Files for User Stories

Nasiphi requested that all team members attach a README file whenever they upload a user story to the repository. The README should clearly describe the functions implemented, removing the need for verbal explanations during meetings and facilitating easier documentation consolidation.

3. reCAPTCHA on Login Page

Nasiphi raised the question of adding reCAPTCHA to the login page. Lungani indicated that given the project timeline, the team should focus on completing and polishing existing features rather than introducing new ones. The suggestion was acknowledged but deferred.

4. Activity Diagram

Nasiphi requested assistance with the activity diagram, citing difficulties. Lungani indicated he would review it before committing. Mutsawashe stated she would also look through the diagram and provide an answer, noting she was not fully confident with the approach.

5. Sprint Planning & Implementation Focus

Sprint planning was discussed, with consensus that the team should proceed with implementation immediately rather than wait for a formal sprint planning session. Lungani advised the team to review the project rubric and ensure the application is polished and ready for presentation.

Action Items

- All members: Review submission guidelines individually before the next meeting.
- Mkatoko: Share the rubric checklist/notes list with the group chat.
- Mutsawashe: Review the activity diagram and confirm whether he is able to assist.
- All members: Begin implementation and refinement tasks in line with the rubric.
