

User Stories:

1. As a patient, when I book an appointment and I do not select a preferred doctor/nurse, I want the system to automatically assign someone to me, so that my appointment can still be created.
2. As a patient, when I book an appointment, I want to select a preferred doctor from the clinic I selected, so that I can be seen by the doctor I prefer.
3. As a patient, I want to receive a reminder 1 hour before my appointment, so that I can leave on time and not be late.
4. As a staff member, I want to add medical notes to a patient's file during consultation, so that other staff members can see the patient's medical history.
5. As a receptionist, I want to add walk-in patients to the queue and assign them to available doctors, so that walk-in patients can be managed properly.
6. As a receptionist, I want to see all booked appointments and check in patients when they arrive at the clinic, so that the clinic can track who has arrived.
7. As a receptionist, I want to log in to my account, so that I can access the receptionist dashboard for my clinic.

User Acceptance Tests:

1. Given the patient is booking an appointment,
When they choose a clinic and time but do not select a preferred doctor/nurse,
Then the system must automatically assign an available doctor/nurse from that clinic.
2. Given the patient selects a preferred doctor/nurse,
When they submit the booking,
Then the appointment must be saved with that selected staff member.
3. Given a patient has a booked appointment,
When the appointment is 1 hour away,
Then the system must send a reminder to the patient.
4. Given a staff member is viewing a patient's file,
When they enter medical notes and save,
Then the notes must be stored in the patient's medical history.
5. Given a receptionist enters a walk-in patient's details,
When they submit the form,
Then the patient must be added to the queue.

Given there are available doctors,
When the receptionist assigns a queued patient to a doctor,
Then the patient's status must update to assigned/serving.
6. Given a patient arrives for their appointment,
When the receptionist clicks check-in,
Then the appointment status must change to checked-in.

7. Given the logged-in user has role receptionist,
Then they must be redirected to the receptionist dashboard.
